### LS-100

#### LS-100: A balance of features & affordability...

The LS-100 comes with a universal power supply and a removable cord. Changing the PC-style power cord & using kilogram calibration, you can freely adapt to any foreign electrical outlets. Additionally, the LS-100 has an RS-232 serial port for connection to a PC or another LS-100. Using the serial port, our Scale-Copy<sup>™</sup> feature allows you to clone a scale in approximately 30 seconds!

#### High Speed Printing & Weighing

Using a state-of-the-art high speed 100mm/sec (4"/sec) durable thermal print head, the LS-100 was built with the most demanding "prepack" applications in mind. With our innovative cassette drawer mechanism, the LS-100 can be loaded with labels quickly & easily. With a larger label roll capacity than most printing scales, the LS-100 allows for the most productivity with minimal down-time. We combined all these great features with an extensive Label Format Library<sup>®</sup> containing the most popular label formats as well as many of our own custom label styles. With this much flexibility, the LS-100 can be easily adapted to replace any scale without having to change your current label stock! You can even design up to 16 of your own custom label formats! With display & printer support for many languages (English, Korean, Spanish...) and ingredients, safe handling, By-weight, By-count, or even simple label printing, you can never go wrong with the LS-100!
