SEAMLESS INNER TANK
 corrosion proof • easy cleaning
 round edge • hygienic design &
 construction

AX-GPC-1

AX-GPC-2

Our pasta cookers are among the kitchen's most reliable and trusted equipment. Chefs world-wide use them to cook fresh or dry pasta, as well as rice, vegetables, potatoes, and seafoods or just to rethermalize. This self-contained cooking system eliminates the dangerous handling of heavy pots containing boiling water. As an option, solid pans can be inserted into the cooking chamber to hold sauces.

GAS PASTA COOKER - STANDARD FEATURES (both models)

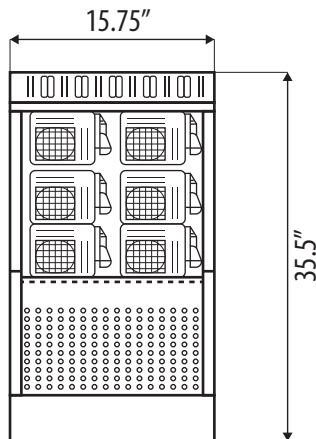

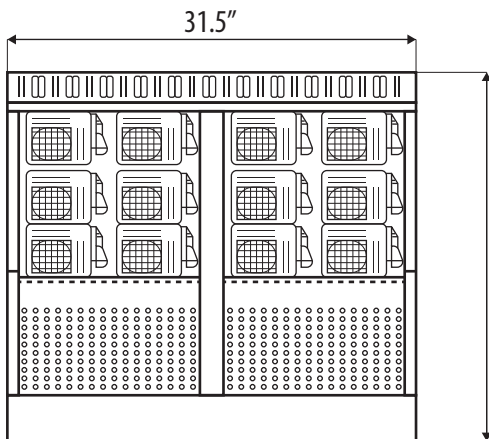

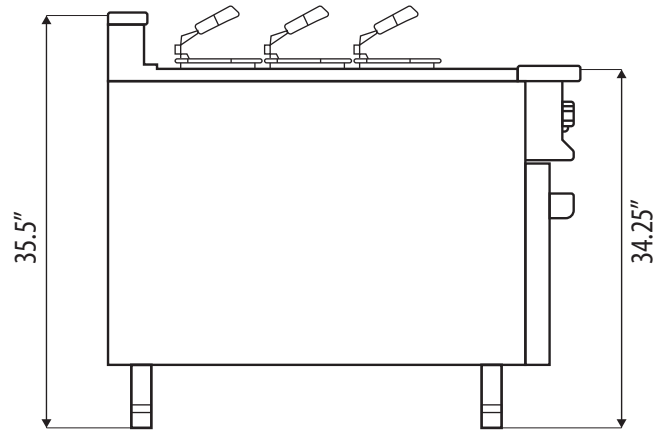

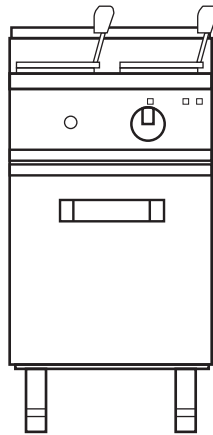

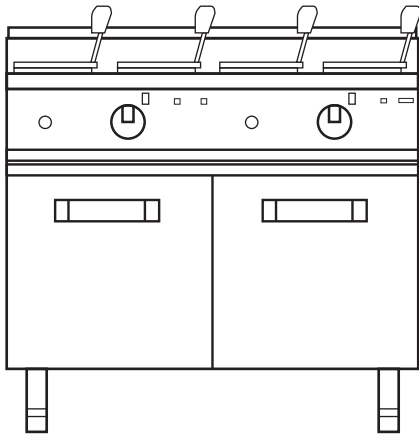

- ★ All heavy-duty stainless steel construction meeting NSF requirements
- ★ One piece deep drawn inner tank #304 stainless steel for ease of maintenance
- ★ Inner tank is corrosion-proof from the effects of salt water and is a hygienic design
- ★ Piezo-electric ignition
- ★ Overflow area safeguards against accidental overflow
- ★ High efficiency burner technology concentrating greater heat at the rear creating a convective flow of water eliminating the need for stirring which shortens cook times
- ★ Energy and time saving mechanism
- ★ Assorted combination of stainless steel mesh baskets with ergonomic positioned handle are included
- ★ Gas injector nozzles provided to switch from Natural to LP gas
- ★ Batter plate
- ★ Bottom-front connection
- ★ Manual gas shut-off valve
- ★ Water inlet, 1" full port drain valve & High capacity overflow drain
- ★ Cooking time: 5-10 min.
- ★ 6" adjustable stainless steel legs
